THE MELANCHOLIC BEAUTY OF MOOMINVALLEY IN NOVEMBER: A JOURNEY INTO AUTUMN AND LETTING GO

When the final book in Tove Jansson’s beloved Moomin series was published in 1970, it took many readers by surprise. Titled **Moominvalley In November**, this was not a cheerful tale of Moomintroll and his parents at home. Instead, it was a quiet, introspective, and subtly melancholic story about a group of characters who arrive at an empty Moominhouse, only to find that the family has already left. The novel is a masterpiece of atmosphere, exploring themes of nostalgia, solitude, and the gentle acceptance of change. For anyone who has ever loved a place or a time that has passed, **Moominvalley In November** offers a profound meditation on what it means to say goodbye.

The Unusual Premise: An Empty House and a Waiting Season

Unlike any other book in the Moomin series, **Moominvalley In November** features almost none of the core family. Moomintroll, Moominmamma, and Moominpappa have already departed for the lighthouse, leaving their beloved valley empty. Into this void come a cast of characters who are all, in their own way, searching for something they have lost. There is Fillyjonk, anxious and tidy; Hemulen, bored and sentimental; the old and philosophical Muskrat; the shy and lonely Toft; and the mischievous, child-like Little My’s absence is keenly felt, though she too is gone. These characters are not the usual heroes of Moominvalley. They are misfits, loners, and individuals burdened by their own preoccupations.

The novel’s setting is crucial. The title itself, **Moominvalley In November**, evokes a specific time of year when the world is turning cold, grey, and damp. The leaves have fallen, the light is dim, and the sea is rough. This is not the sunny, carefree summer of earlier books. Jansson uses the November atmosphere as a character in itself, painting a landscape that is both beautiful and unforgiving. The house, usually a symbol of warmth and safety, stands cold and silent. The characters must confront the fact that the comfort they seek—the Moomin family’s unconditional love—is not available to them. They must learn to create their own warmth.

Character Studies: Loneliness and the Search for Belonging

Each character in **Moominvalley In November** represents a different response to solitude and change. Jansson’s genius lies in her ability to make each perspective deeply human, even when the characters are whimsical creatures.

FILLYJONK: THE PRISONER OF ORDER

Fillyjonk arrives with a trunk full of cleaning supplies and a desperate need to impose order on the empty house. She is anxious, controlling, and terrified of the unknown. Her cleaning rituals are a way to ward off the chaos she fears inside herself. In the quiet of the valley, she is forced to slow down and eventually confront the sadness she has been avoiding. Her journey is one of learning to sit still, even when it is uncomfortable.

HEMULEN: THE SENTIMENTAL COLLECTOR

Hemulen is a character who lives in the past. He is obsessed with the memory of the Moomin family and tries to recreate their presence through imitation and collection. He wears Moominpappa’s hat and tries to write a memoir, but he only succeeds in highlighting his own emptiness. Hemulen represents the trap of nostalgia—the belief that we can possess the past by holding onto its objects. In the end, he must let go of the fantasy and accept the reality of the present.

TOFT: THE QUIET OBSERVER

Toft is perhaps the most poignant character in the book. He is a shy, imaginative boy who has never actually met the Moomin family. He has only heard stories about them. He arrives at the house and hides in a closet, too afraid to join the others. Toft is the embodiment of longing and creative daydreaming. He imagines Moominmamma’s gentle presence so vividly that he almost brings her to life. His arc is about finding the courage to emerge from hiding and claim his own voice. Toft’s story is a beautiful reminder that belonging is not always about being in a place, but about finding a way to be at home with yourself.

THE MUSKRAT: THE PHILOSOPHER OF DETACHMENT

The Muskrat is an old philosopher who has given up on desire. He believes that the key to happiness is to want nothing. He is cynical, lazy, and often

rude, but he also possesses a kind of wisdom. In the context of the empty valley, his philosophy is tested. He must admit that even he feels a sense of loss. The Muskrat teaches that detachment is not the same as numbness, and that acknowledging our attachments is part of being alive.

Themes of Grief, Acceptance, and the Coming of Winter

At its core, **Moominvalley In November** is a book about grief. Not the sharp, traumatic grief of a sudden death, but the quiet, creeping grief of change. The valley itself is in a state of decay. The gardens are overgrown, the boat is damaged, and the cold is settling in. The characters are all grieving something: a lost family, a lost ideal, a lost version of themselves.

Jansson handles these themes with extraordinary tenderness. She does not offer easy solutions. There is no dramatic reunion. The Moomin family does not return by the end of the book. Instead, the characters slowly learn to care for each other. They cook a meal together. They tell stories. They fix the roof. They come to terms with the fact that the house is not the same without the family, but that it can still be a place of comfort. The final scenes are not triumphant, but they are deeply hopeful. The characters find a fragile, tentative connection. They learn that life goes on, even in November.

The book is also a profound meditation on the nature of memory. How do we hold onto the people and places we love? Can we ever truly go back? Jansson suggests that we cannot. The Moominvalley of the past is gone. But the act of remembering, of telling stories, and of coming together in shared silence, creates a new kind of home. The empty house becomes a space for the characters to build their own stories.

Literary Style and Atmosphere: The Quiet Power of Jansson’s Prose

Jansson’s writing in **Moominvalley In November** is stripped back and poetic. She uses short sentences and precise imagery to create a haunting atmosphere. The mist over the river, the sound of the wind in the chimney, the smell of damp wool and woodsmoke—every detail is carefully chosen. The narrative voice is intimate and slightly melancholic, but never sentimental. Jansson trusts her readers to sit with the sadness and find the beauty within it.

The book is often considered the most adult of the Moomin series. It deals with existential questions about purpose, loneliness, and the passage of time. However, it is still accessible to younger readers because it speaks to universal emotions. Anyone who has ever felt out of place, or missed someone, or watched a season change with a heavy heart, will recognize themselves in these pages. Jansson’s genius is that she never talks down to her audience. She treats complex emotional states with the respect they deserve.

The Legacy of Moominvalley In November

For many readers, **Moominvalley In November** is the most powerful book in the entire series. It is a fitting conclusion to a cycle that began with joy and adventure and ended with quiet reflection. Jansson herself once said that she wrote the book to explore the idea of letting go. After decades of living with these characters, she was ready to say goodbye. The book is her farewell to the Moomin world, but it is a farewell filled with love.

The book has also been praised for its nuanced portrayal of neurodiversity. Characters like Fillyjonk (with her anxiety) and Toft (with his social fears) resonate deeply with readers who see themselves in these struggles. Jansson normalizes these experiences without labeling them. She simply shows that everyone has their own way of coping with the world, and that is okay.

In recent years, **Moominvalley In November** has found a new audience through translations and adaptations. It has been adapted into a stage play and a film, though the book’s quiet power is best experienced on the page. It continues to be a source of comfort for those navigating change, loss, or the end of a chapter in their lives.

CONCLUSION: THE SEASON OF LETTING GO

Moominvalley In November is not a book for anyone looking for a lighthearted adventure. It is a book for a rainy afternoon, for a quiet evening, for a time when you need permission to feel sad without needing to be fixed. It teaches us that emptiness can be a space for growth, that loneliness can be shared, and that even in the darkest November, there is a warmth to be found in human (and Moomin) connection. Tove Jansson’s final Moomin novel is a rare gift: a story that acknowledges the pain of change while affirming the enduring value of community, memory, and love. It reminds us that while winter is coming, we can still gather around the stove, tell stories, and wait for the spring—together.
