UNLOCKING THE NEXT PHASE: YOUR GUIDE TO THE 17 DAY DIET CYCLE 2 MEAL PLAN

The journey to sustainable weight loss is rarely a straight line. It requires strategy, adaptation, and a deep understanding of how your body responds to different foods. The **17 Day Diet Cycle 2 Meal Plan** is a pivotal turning point in the popular 17 Day Diet protocol. After successfully navigating the initial

"Accelerate" phase, Cycle 2 introduces a crucial shift: the strategic reintroduction of certain foods while maintaining a high rate of fat burning. This phase is designed to prevent metabolic adaptation, keeping your body guessing and your progress moving forward. If you are ready to break through a plateau or simply want to understand how to structure your eating for the second phase of this diet, you have come to the right place. Let us explore exactly what this cycle entails, what you can eat, and how to build a meal plan that is both satisfying and effective.

Understanding the Core Philosophy of Cycle 2: The "Activate" Phase

The 17 Day Diet, created by Dr. Mike Moreno, is broken into four distinct cycles: Accelerate (Cycle 1), Activate (Cycle 2), Achieve (Cycle 3), and Arrive (Cycle 4). Each cycle lasts for 17 days. The primary goal of Cycle 2, the "Activate" phase, is to speed up your metabolism. In Cycle 1, you drastically

reduced your caloric intake and eliminated nearly all carbohydrates, putting your body into a state where it burned stored fat for fuel. While effective, the body can adapt to this low-calorie, low-carb state, leading to a plateau.

The 17 Day Diet Cycle 2 Meal Plan strategically combats this by introducing "probiotic" foods and a wider variety of lean proteins and low-glycemic vegetables. More importantly, it alternates between days of low-carb eating and days where you add back a modest amount of starchy carbohydrates (like sweet potatoes or beans). This carb-cycling technique prevents your metabolism from slowing down, keeps your energy levels stable, and makes the diet more sustainable. It

is less about deprivation and more about intelligent timing and food choices.

The Fundamental Rules of the Cycle 2 Meal Plan

Before you dive into sample menus, it is essential to grasp the structural rules that define the **17 Day Diet Cycle 2 Meal Plan**. Adhering to these guidelines is what makes the phase effective.

- **Alternate Meal Plans:** You will follow "Plan A" (low-carb, similar to

Cycle 1) for one day, and "Plan B" (includes one starchy carb serving) for the next day. You repeat this 1-A, 1-B pattern for the entire 17 days.

- **Probiotic Power:** This cycle introduces probiotic foods like plain Greek yogurt, kefir, or fermented vegetables. These help support gut health, which is directly linked to improved digestion and weight management.
- **Lean Protein is Still King:** You will continue to eat a significant portion of lean protein (chicken, fish, turkey, eggs, tofu) at every meal to support muscle mass and satiety.
- **Two Types of Vegetables:** You

will eat "Cleansing Vegetables" (like greens, cucumbers, celery) freely and "Low-Glycemic Vegetables" (like broccoli, cauliflower, bell peppers) in moderate portions.

- **Healthy Fats:** You will continue using good fats like olive oil, flaxseed oil, and avocado in moderation.
- **Hydration is Non-Negotiable:** You must drink at least 8-10 glasses of water daily.

What to Eat on

Plan A (Low-Carb Day)

Plan A days are very similar to the Cycle 1 protocol. They are low in calories and very low in carbohydrates. These days are designed to continue aggressive fat burning. Your meals should be built around lean protein, generous portions of cleansing vegetables, and a smaller portion of low-glycemic vegetables.

SAMPLE DAY ON PLAN A

Breakfast:

- 2 scrambled eggs cooked with spinach and a splash of water (use non-stick spray or a little broth)

- 1 cup of green tea or black coffee

- A small handful of raw almonds (about 10-12)

Lunch:

- Large green salad with 4-6 ounces of grilled chicken breast
- Unlimited lettuce, cucumber, celery, and tomatoes
- Dressing: 2 tablespoons of olive oil and vinegar or lemon juice

Dinner:

- 6 ounces of baked cod or tilapia
- 1.5 cups of steamed broccoli and cauliflower
- Seasoned with herbs, garlic, and a squeeze of lemon

Snack (if needed):

- Celery sticks or cucumber slices

What to Eat on Plan B (Carb-Boost Day)

Plan B days are what make the **17 Day Diet Cycle 2 Meal Plan** unique. On these days, you will add one serving of a healthy, "probiotic" carbohydrate. This is not a free-for-all; it is a controlled reintroduction of energy-dense foods to shock your metabolism. You will also incorporate a serving of a probiotic food.

**APPROVED STARCHY CARBS FOR
PLAN B (CHOOSE ONE SERVING
PER DAY)**

- 1/2 cup cooked brown rice or quinoa
- 1 medium sweet potato (or 1/2 cup mashed)
- 1/2 cup cooked lentils, chickpeas, or black beans
- One piece of whole-grain, high-fiber bread (like Ezekiel bread)

**APPROVED PROBIOTIC FOODS FOR
PLAN B (CHOOSE ONE SERVING
PER DAY)**

- 1 cup plain, non-fat Greek yogurt
- 1/2 cup low-fat kefir
- 1/2 cup fermented sauerkraut or

kimchi (ensure no sugar added)

SAMPLE DAY ON PLAN B

Breakfast:

- 1 cup plain non-fat Greek yogurt
- 1/2 cup fresh blueberries or sliced strawberries
- 1 tablespoon of ground flaxseed

Lunch:

- Large salad with 4-6 ounces of grilled shrimp
- Mixed greens, bell peppers, onions
- Dressing: 2 tablespoons of olive oil and balsamic vinegar
- **Starch serving:** 1/2 cup of cooked quinoa added to the salad

Dinner:

- 6 ounces of lean sirloin steak
- 1.5 cups of roasted asparagus and zucchini
- **Note:** You have already used your starch serving at lunch, so dinner remains low-carb. You do not eat a starch at every meal on Plan B; you eat one single serving for the entire day.

Snack (if needed):

- A few radishes or sugar snap peas

Applying the Alternating

Pattern: A 4-Day Sample Cycle

To visualize how the **17 Day Diet Cycle 2 Meal Plan** works in practice, here is a short sequence. Notice how the starch and probiotic foods cycle in and out.

Day 1 (Plan A - Low Carb): Similar to the sample above. No starches, no yogurt.

Day 2 (Plan B - Carb Boost): You have a sweet potato with dinner. You enjoy a cup of Greek yogurt for a snack.

Day 3 (Plan A - Low Carb): Strictly lean protein and vegetables.

Day 4 (Plan B - Carb Boost): You have a slice of whole-grain toast with your

morning eggs. You add a serving of kimchi to your lunch salad.

You continue this 1-A, 1-B rotation for the full 17 days. This rhythmic alternation is the engine of the "Activate" phase.

Key Foods to Embrace and Avoid in Cycle 2

Knowing exactly which foods are tools and which are traps is critical for success on the **17 Day Diet Cycle 2 Meal Plan**.

FOODS TO EMBRACE

- **Lean Proteins:** Chicken breast,

turkey breast, fish (salmon, cod, tuna), shellfish, eggs, egg whites, tofu, lean cuts of beef and pork.

- **Cleansing Vegetables:** Asparagus, celery, cucumber, lettuce, onions, radishes, tomatoes.
- **Low-Glycemic Vegetables:** Broccoli, cauliflower, Brussels sprouts, cabbage, kale, spinach, bell peppers, green beans.
- **Healthy Fats:** Olive oil, flaxseed oil, avocado, raw nuts (in small, measured portions).
- **Probiotics (on Plan B days only):** Plain Greek yogurt, kefir, fermented vegetables.
- **Starchy Carbs (on Plan B days only):** Sweet potatoes, brown rice, quinoa, lentils, beans, whole-grain

bread (with high fiber content).

- **Beverages:** Water, green tea, black coffee, herbal tea.

FOODS TO STRICTLY AVOID

- **Sugar and Artificial Sweeteners:** No regular soda, candy, pastries, or diet drinks with artificial sweeteners.
- **Refined Grains:** White bread, white rice, pasta, crackers, and most breakfast cereals are forbidden.
- **Starchy Vegetables (except on Plan B):** Potatoes, corn, and peas are restricted to Plan B days only.
- **Fruit:** Most fruits are eliminated in Cycle 2, except for occasional berries on Plan B days. Dried fruit is not allowed.

- **Full-Fat Dairy:** Only non-fat or low-fat versions of plain yogurt and kefir are permitted. Milk and cheese are not part of this plan.
- **Alcohol:** Alcoholic beverages are strictly prohibited during the 17-day cycle.

Tips for Success on the Cycle 2 Meal Plan

Success with the **17 Day Diet Cycle 2 Meal Plan** is about more than just a list of foods. It requires mindset, preparation, and smart strategies.

1. **Master the "Naked" Plate:** On Plan A days, your plate should look simple: a large portion of lean protein, a huge pile of greens or steamed vegetables, and a small amount of healthy fat. Keep seasonings to herbs, spices, lemon juice, and vinegar.
2. **Meal Prep is Your Best Friend:** Spend a few hours on Sunday prepping for the week. Grill a batch of chicken breasts, hard-boil eggs, wash and chop vegetables, and cook a batch of quinoa or brown rice for your Plan B days. Having these components ready makes assembling meals effortless and prevents poor choices.
3. **Listen to Your Body:** The Plan B days are meant to be a metabolic boost, not a day of indulgence. Stick to the single serving of starch. If you find yourself feeling overly hungry on Plan A days, increase your intake of cleansing vegetables. You can eat an almost unlimited amount of greens and celery.
4. **Spice It Up:** Variety is crucial for adherence. Use different herbs and spices to keep your taste buds engaged. Garlic, ginger, cumin, chili powder, oregano, rosemary, and turmeric can transform a simple piece of fish or chicken into a delicious meal.
5. **Stay Hydrated:** Water helps manage hunger, supports metabolism, and flushes out toxins. If you feel hungry, drink a

large glass of water first. Often, thirst is mistaken for hunger.

A Sample 3-Day Menu to Get You

Started

Here is a more detailed look at a short cycle to show you the rhythm and variety you can achieve.

Day 1: Plan A (Low-Carb Day)

- **Breakfast:**
