## MASTERING HYRULE AND LORULE: YOUR ULTIMATE GUIDE TO THE LEGEND OF ZELDA: A LINK BETWEEN WORLDS

---

Few titles in the beloved Zelda franchise manage to blend nostalgia with genuine innovation as seamlessly as **The Legend of Zelda: A Link Between Worlds**. As a direct sequel to the iconic A

Link to the Past, this Nintendo 3DS gem pays homage to its predecessor while forging its own identity. Whether you are a seasoned hero or a newcomer stepping into Link's shoes for the first time, navigating the interconnected realms of Hyrule and Lorule can be both exhilarating and daunting. This comprehensive walkthrough is designed to guide you through every major dungeon, important item, and tricky puzzle,

ensuring you save both kingdoms without missing a beat. From mastering the wall-merging mechanic to defeating Yuga and Ganon, consider this your essential companion.

## Understanding the Core Mechanics Before You Start

Before diving into the walkthrough, it is crucial to understand what sets *A Link Between Worlds* apart. The game introduces the **Rental System**, a significant departure

from traditional *Zelda* item progression. Instead of finding new tools in specific dungeons, you can rent items from Ravio's shop in Hyrule early in the game. This allows for a non-linear approach to dungeon order, giving you incredible freedom.

However, there is a catch: if you die, you lose all rented items and must repurchase them. To permanently own an item, you must buy it for a much steeper price later in the game. This mechanic encourages strategic risk-taking and careful saving. The other revolutionary feature is the ability to merge into walls as a living painting. This 2D transformation is essential for navigating puzzles, crossing chasms, and accessing

hidden areas. Mastering the flow of this mechanic is the single most important skill for completing this walkthrough successfully.

# The Opening Hours: Escaping the Sanctuary and Laying the

## Foundatio n

Your journey begins in the peaceful streets of Hyrule. The story kicks off quickly as Link is sent on an errand to deliver a sword to the blacksmith. Do not dawdle; this is a straightforward sequence designed to teach you basic movement and combat. Your goal is to reach the Sanctuary near Hyrule Castle. Upon arrival, you will witness a cutscene introducing the Lorulean sorcerer, Yuga, who turns the Sages into paintings. Link is knocked unconscious but awakens with the power to merge into walls, a gift from the mysterious merchant,

Ravio.

### Key Early Steps:

- Return to Ravio's shop to obtain the rental items: Your first visit allows you to rent the Tornado Rod, Bombs, and the Bow. These are your bread and butter for the first segment of the game.
- **Collect Maiamais:** As you explore Hyrule, you will find small, shell-like creatures called Maiamais. Rescuing them and returning them to their mother in her house near Kakariko Village rewards you with upgrades to your rented items. This is a high-

priority side activity that significantly boosts your combat effectiveness.

- Save often: Use the save option freely. Dying means losing rentals, and the game punishes recklessness. Create a habit of saving before entering any major area or boss room.

With your tools acquired, you can tackle the first dungeon. While you have some choice in the order, the most natural starting point for a balanced walkthrough is the **Eastern Palace**.

# Dungeon Walkthrough: Eastern Palace

The Eastern Palace is an excellent introductory dungeon, emphasizing your new wall-merging ability. The primary objective here is to navigate the puzzle-locked doors and defeat the mini-bosses to reach the boss, Yuga.

## Tips for the Eastern Palace:

- **Use the Bow:** Many switches and enemies, like the Armos Knights, require precise shots

with your Bow to disable.

- **Wall Merge Secret:** Look for cracks in the walls or paintings that resemble portals. Merging into these will allow you to walk around blocked hallways entirely. The dungeon is a 3D puzzle box where the 2D perspective reveals hidden pathways.
- **Boss Strategy: Yuga (First Form):** Yuga is not a physically aggressive boss. He transforms into a painting and floats around the room. Your goal is to shoot him with an arrow while he is in his painted form to stun him,

then slash his physical form. Dodge his slow projectiles and repeat. This fight is a tutorial for the final confrontation, so learn the rhythm.

After defeating Yuga, he flees to Lorule. You will then be guided to create the special painting that acts as a portal between worlds. This opens the central mechanic of the game: traveling between Hyrule and its dark mirror, Lorule.

## Navigating the Dual

## Worlds: Hyrule and Lorule

Once the portal is active, the game truly opens up. You can now traverse between the two versions of the same map. Lorule is a desolate, decaying land ruled by the evil Yuga and Princess Hilda. The geography is similar, but locations are warped. A house in Hyrule might be a crumbling ruin in Lorule, and a wall of rock in Hyrule might be a passable gap in Lorule.

### **Essential Exploration Advice:**

- Check the

### **Ravio Shop**

**Regularly:** As you progress, Ravio will stock new items. Do not hoard rupees for the purpose of buying items immediately. It is often better to rent them first to experiment. The buying option becomes available after you have conquered a certain number of dungeons. Items like the Sand Rod, Fire Rod, and Ice Rod are essential for specific dungeons.

- **Use the Fortune Teller:** The fortune teller in Kakariko Village can reveal the location of

missing Maiamais and hidden heart pieces. This is a lifesaver for completionists.

- **Link Between Worlds Map Strategy:** The map on the bottom screen of your 3DS is your best friend. Mark locations of cracked walls in Hyrule that lead to Lorule, and vice versa. Many side quests require you to find the same location in both worlds to solve a puzzle.

## Dungeon Walkthro

# ugh: The Tower of Hera (A Non- Linear Choice)

This is a great second or third dungeon. Located near the top of Death Mountain, the Tower of Hera requires the **Fire Rod** to melt ice blocks and the **Tornado Rod** to activate wind switches. The dungeon is a vertical climb focused on precise wall-merging to reach higher floors.

## Key Sections:

- **Ice Block Puzzle:** You will

encounter rooms filled with sliding ice blocks. Use the Fire Rod to melt specific blocks to create a path forward. This is a classic Zelda puzzle with a 2D twist.

- **Wall Merge Climb:** The central tower shaft requires you to merge into walls that circle the tower. Walk along the painted path on the outer wall while avoiding falling platforms. Your sense of orientation will be tested here.
- **Boss Strategy:** **Moldorm:** This giant worm is a returning classic. It has no specific weak point; you must strike its

tail. It moves quickly and can knock you off the platform. Do not be greedy with your strikes. Wait for it to circle, hit the tail once or twice, and then reposition.

Success here grants you a Pendant of Courage, which unlocks the Master Sword in Hyrule Castle's secret shrine. With the Master Sword, standard enemies become much less threatening, and you can damage certain dark crystals.

## Mid-Game

# Strategies: The House of Gales and Skull Woods

Once you have the Master Sword, the pressure decreases slightly. You are now free to tackle the remaining dungeons in any order. For a logical progression in this walkthrough, we recommend heading to the **House of Gales**.

## House of

# Gales

## Dungeon Walkthrough

### ugh

Located in the southern swamp area, this dungeon is all about controlling wind and air currents. You will need the **Tornado Rod** heavily here.

- **Puzzle Focus:**

Many rooms have fans and wind tunnels. You can use the Tornado Rod to create updrafts that lift platforms or change the direction of falling objects. You must also use it to knock down hovering enemies.

- **Boss Strategy:**

**Margomill:** This is a mechanical pinwheel boss. It has multiple eyes that open and close. You must use the Tornado Rod to flip it over, exposing its weak point, then strike with your sword. It spins faster as it loses health, requiring quicker reflexes.

# Skull

## Woods

## Dungeon

## Walkthrough

### ugh

Returning to the dark forest of Lorule, Skull

Woods is a maze of interconnected caves and outdoor areas. The **Fire Rod** is essential for burning away spider webs blocking your path.

- **Navigation Tip:**

The dungeon is non-linear. You will exit the cave and re-enter in different locations. Pay attention to the visual cues on the Lorule overworld map. If you see a cave entrance, try to reach it on the overworld to find a new dungeon room.

- **Boss Strategy: Knucklemaster:**

This giant hand monster slams the ground and tries to grab you. The key is to shoot it with an

arrow or use the Fire Rod to stun it, then attack its single large eye. It will break the floor into platforms, so use your wall-merging ability to navigate the chasm.

## Late Game Dungeon S: Thieves' Hideout and Ice

# Ruins

As you collect the Pendants and Sages, the difficulty ramps up. The **Thieves' Hideout** requires stealth and the Sand Rod to tranquilize the sand-covered floors. The **Ice Ruins** require the Ice Rod to freeze enemies into blocks that can be used as stepping stones or weights on switches. These dungeons test your mastery of your entire inventory.

## Late Game Combat Tips:

- **Item Swapping:**  
Use the quick-select menu on the touchscreen. Being able to swap between the Bow, Fire Rod, and Tornado Rod in

seconds is vital for late-game combat arenas.

- **Blue and Gold Maiaimai**

**Upgrades:** By this point, you should have found a significant number of Maiaimais. Prioritize upgrading the Bow and Bombs first, as these have the most combat utility. The upgraded Bow (Nice Bow) fires three arrows at once, decimating multiple enemies.

# The Final

# Dungeon Walkthrough

## 13: Lorule Castle and the True Final Boss

Once all seven Sages are awakened, you are summoned to Lorule Castle. This is not a single room; it is a massive, multi-story dungeon.

## Lorule Castle Walkthrough

This is a gauntlet. You will face mini-bosses and puzzle rooms that require every item you have collected. There is a notable room where you must navigate a pinball-like maze using the Hammer. Another room requires you to use the Fire and Ice Rods in rapid succession to hit two switches at once.

### **Final Boss Phase 1: Yuga (Transformed)**

- Yuga fuses with Ganon, becoming a giant, grotesque creature. This boss fight takes place in a circular arena with four pillars. Yuga-Ganon can shoot fireballs and summon

bats. The strategy is to use an item (Bow or Hammer) to knock him down, then rush in and hit his tail. He will slam the ground, causing crystals to fall. Use these crystals to hide from his powerful beam attack.

### **Final Boss Phase 2: Yuga Ganon (The True Form)**

- After depleting his health bar, the fight transitions to a painting-based battle. The floor becomes a giant canvas. You and Yuga Ganon will be forced into your 2D painting forms. You must merge into the walls to evade

his attacks. He will try to ram you while you are on the wall. The key is to jump off the wall at the right moment to land on his head and strike him. This phase is purely about mastering the wall-merging mechanic. Timing is everything. Strike his head three times to end the battle.

## Side Quests and Collectibl

# es: Finding Every Heart Piece and Maiamai

To truly complete A Link Between Worlds, you will want to hunt down every Heart Piece and Maiamai. There are 50 Maiamais in total. Finding them all rewards you with the powerful **Light Bow**, which does massive damage to the final boss.
